Precautions

This Manual includes important safetyprecautions and the instructions to various functions of the product. To avoid any accident, please read this product manual carefully before use.

1. This product refers to high-precision electronic product. Do not disassemble it personally.

2. Do not hit or drop this product heavily, otherwise, damage or abnormal display may occur.

3. Do not leave this product in the hot, wet and dusty environments, or expose this product under strong magnetic field or sunlight for a long time.

4. Please select a suitable volume to avoid hearing loss.

5. Use wrung wet cotton cloth to scrub this product softly. Do not use other chemical solutions to scrub this product.

6. Do not disconnect this product while uploading and downloading, or it may cause program errors.

7. Please use the batteries, chargers and accessories allowed by the manufacturer, or dangers may occur and the warranty regulations will not take effect.

8. Please treat the discarded products and accessories in accordance with the relevant local environmental protection regulations.

9. Do not use this product in environments where electronic equipment is prohibited to use, such as on the airplane.

10. Do not use this product while driving or walking on the street to avoid any accident.

11. In case of any problem during the use of this product, please contact the CustomerServiceCenter of our Company directly.

12. Please backup important data of this product regularly.

13. All data may be erased out from the product during repairing, and be restored to the default factory setting.

14. Our Company will not undertake any responsibility for the data loss due to product damage, repair or other reasons. Please operate this product in accordance with this Manual.

※ Our Company reserves the right to improve this product. Specification and design of the product are subject to the change without prior notice. Sorry for the inconvenience.

This equipment has been tested and found to comply with the limits for a Class B digital device，pursuant to part 15 of the FCC Rules.
If not used in accordance with the instructions, may cause harmful interference.
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may

Cause undesired operation.

FCC RF warning statement: the device has been evaluated to meet general RF exposure requirement , The device can be used in portable exposure condition without restriction.

I.Basic Functions

1. Hardware configuration

Processor	Intel clover trail+ Z2580 2.0GHz
Operating system	Android 4.2.2
Memory	LPDDR2 1GB/2GB (depending on detailed types)
Equipment memory	8GB/16GB (depending on detailed types), supporting extended functions
Screen type	10.1 inch multi-touch IPS display
Resolution	1,920×1,200
Camera	Front: 200W, Rear: 500W
GPS	Supporting
Multi-media	Supporting 1,080P video playing
Audio format	Supporting MP3, WMA, WAV, AAC, APE, FLAC, AMR, M4A and WV formats
Video format	Supporting RM/RMVB, AVI, WMV, MKV, DAT, 3GP, TS and MP4 formats
Port	MicroSD card slot, Micro USB port, 3.5mm audio interface, Micro HDMI
Battery capacity	7,300mAh, theoretic standby time: 300 hours
Dimension/weight	216.5X170X9.2mm, 590g
Bluetooth	BT3.0
Power supply	5V/2A

II.G 10 Overview
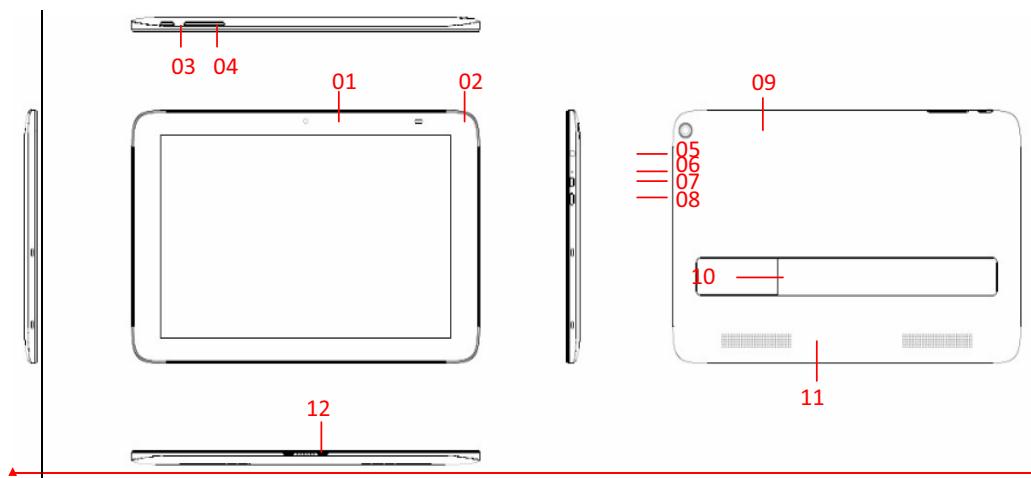

01.   Front camera
02.   Light/distance sensor (some models)
03.   Power key
04.   Volume keys +/-
05.   Earphone interface
06.   MIC
07.   HDMI interface
08.   USB interface (data transmission and charging)
09.   Rear camera
10.   Micro SD card slot (some models)
11.   Speaker port
12.   DOCK_PIN (some models)

III. Status Icons

The status bar displays the time, battery status, signal intensity and notification icon.

	Battery low		Music playing
	Battery critical low		USB connected
	Charging		Alarm clock On
	New Email		Earphone inserted

About equipment

Viewing the software version information of the tablet

11. **Software installation and management**

This tablet supports Android platform based applications of a third party. Most of such applications

can be downloaded from the network, and then uploaded to the tablet or the Micro SD card.

Click the installed "Resource manager" or "File manager" icon (here taking the resource manager for

example), and select the APK applications to be installed.
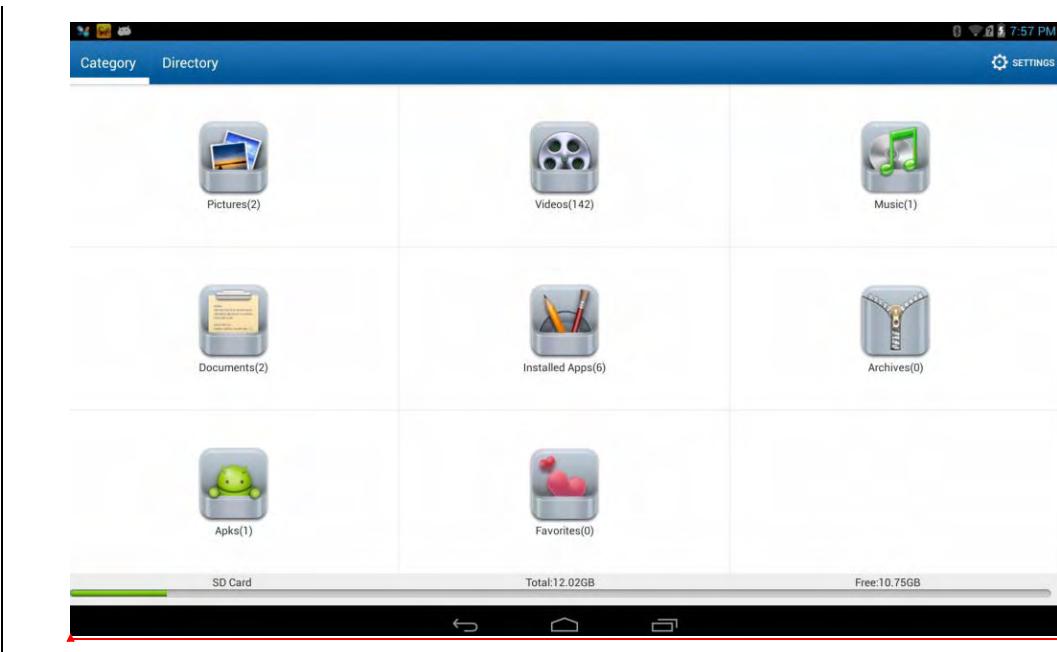

12. Uninstalling APK applications

Click the "Settings" on the desktop to enter "Settings", and select "Apps", and then click the desired

application to uninstall.

Click the "Uninstall" icon to uninstall it.
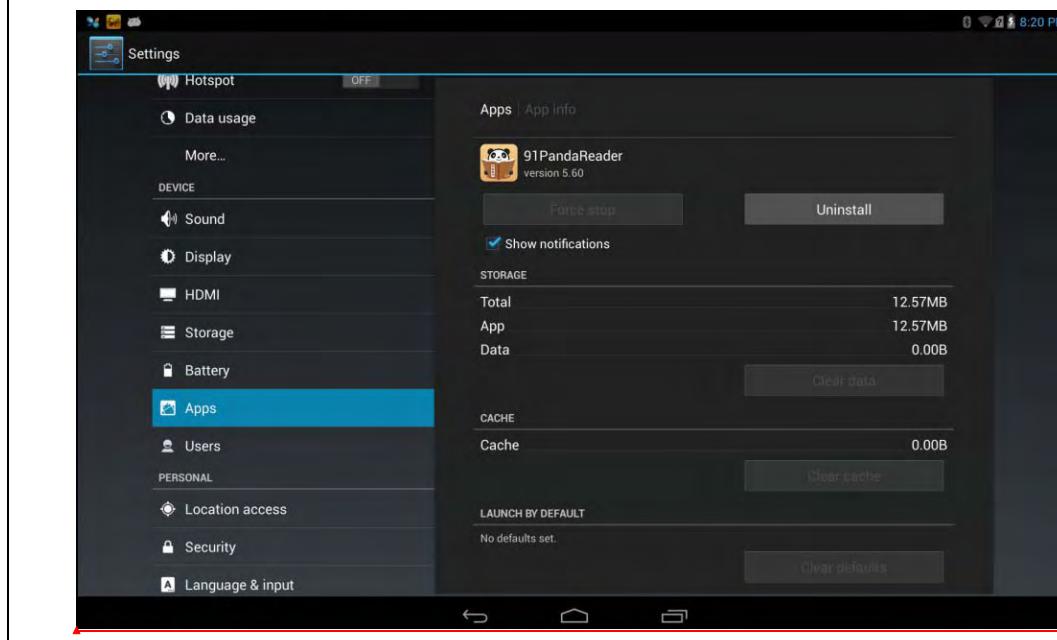

13. **HDMI output**

♦ Turn on a TV, and set the signal input source to be the HDMI input status.

♦ Turn on the tablet, and connect it to the TV with a HDMI cable. This moment, the tablet and the

TV will display synchronously.

♦ In the HDMI output status,unplug the HDMI cable to exit from the TV output status.

14. Connecting with PC

This tablet can be connected with a PC through a USB cable to copy or delete data:

◆ Connect this tablet with a PC through a USB cable, and the notification bar will display "USB connected".

15. Factory reset

If this tablet runs abnormal when attacked byvirusesoroperates third-party software, the factory default status can be restored through the factory reset to remove the third-party software.

Access "Settings" – "Backup and reset", select "Factory data reset", and confirm it to erase all data.

★ Note: All data will be erased in this case. Please make backup in advance.
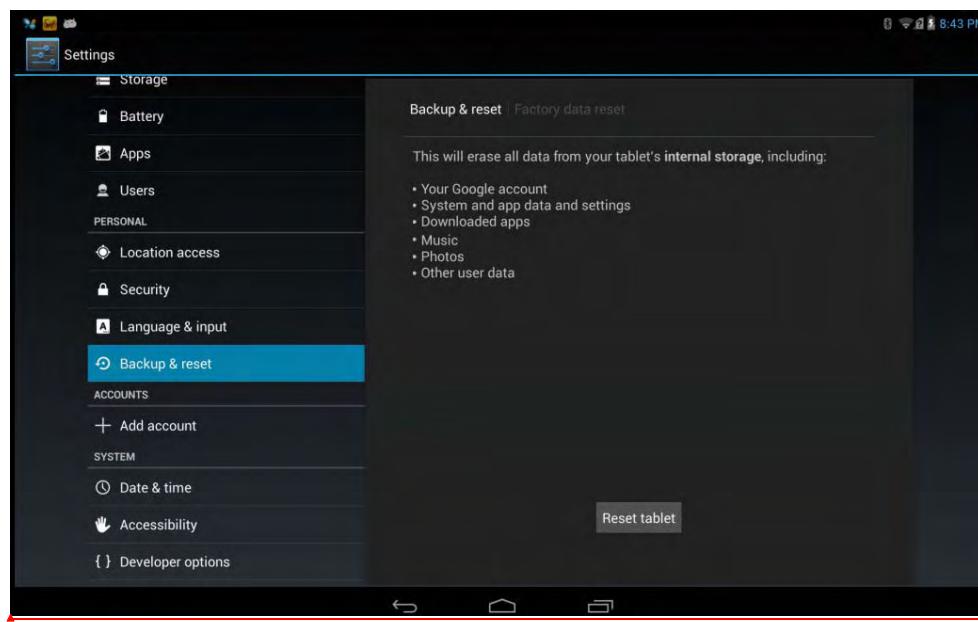

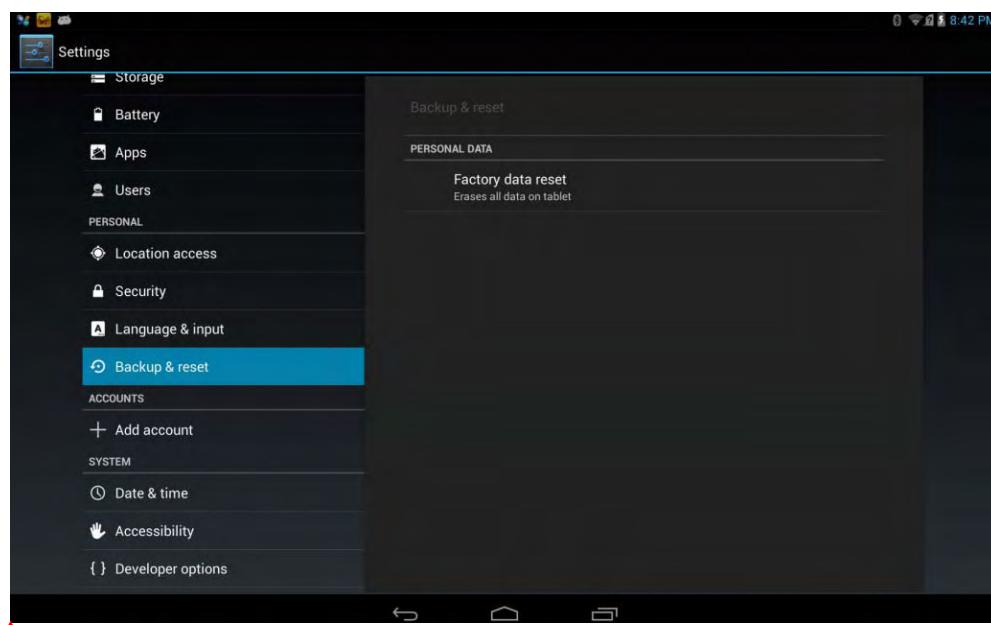

16. **Android FAQ**

Q: What is the APK file? What is the relationship between it and Android?

A: APK is the abbreviation of Android Package, i.e. Android installation package. It can be installed through directly transmitting the APK file to the Android emulator or Android equipment.

Q: How to acquire the APK applications?

A: You could go to "Google Play Store" to get them or download corresponding applications inthe APK format.

Q: Why does the Wi-Fi connection fail?

A: If the "screen timeout" is set, when the tablet is in the screen protection status, the Wi-Fi function will be closed automatically to save energy; after the tablet is waken up, the Wi-Fi function will restore automatically after screen unlock.

Q: Why the gravity sensing function cannot be realized?

A: This product supports the gravity sensing function, and the horizontal and vertical screen display can be switched through shaking. However, some applications do not support this function, so the screen switching function cannot be realized, whichdoesn't belong to the product function troubles.

17. **FAQ**

1. The tablet cannot be started up.

    Check the battery state;

    Recheck after connecting the charger;

If this trouble still exits after charging, please call the Hampoo service center.

2. The earphone has no sound;

    Please check whether the media volume is the minimum;

    Please check the earphone connection condition.

3. The tablet can't be charged normally.

    Please confirm whether the adopted charger conforms to the charging requirements of the tablet.

4. Files cannot be copied.

    Please confirm whether the connection between the computer and the tablet is correct;

    Please use the post USB interface of the computer as much as possible.

5. Why some downloaded videos cannot be played normally?

This product is compatible with most video files on the internet. However, the difference of parameters such as video formats, coding methods, resolution, and data rates provided on the internet may cause the playing failure or abnormal playing of some video files. It is suggested to use the third-party video conversion software for convertingfile formats on your PC, and copy them to the tablet for playing.

6. Applications have noresponse in the tablet.

    In this case, press and hold the power key to conduct compulsory shutdown and then restart up the tablet.
